

LIGHT TOUCH™

The Cure All

*Versiflex UV curing systems

The LIGHTTouch™ *Versiflex Programmable Logic Controlled UV Curing System offers converters a proven performer for reliable everyday UV production. *Versiflex UV systems include configurations up to 14 lamps, automatic & manual five-stage intensity adjustment, and full programmability through the color touch screen operator interface.

- Standard color touch-screen remote control for simple on-the-fly adjustments
- Fully programmable five-stage auto intensity adjustment in 400 & 600 WPI
- Operator programmable shutter timing & bulb timer resets
- On-screen automatic troubleshooting and fault-protection minimizes downtime & waste
- "Cool UV" lamp assemblies incorporate cold and hot mirror dichroic technology along with closed-loop variable speed air flow controls for optimum heat management at the web.
